The Affordable Alternative to Natural Stone

Cost won't rock your budget

Looks and feels like stone

Zero Maintenance

Fast and Easy Installation

Patent Pending

Unaffected by temperature

*Outstanding impact
strength*

Earthquake Resistant

Faux Fencing is a new, unique one-piece polymer composite wall system. It is the ideal material for the construction of dry-stacked walls. Many styles of Faux Fence are available. From traditional limestone dry stack wall to beautiful river rock.

We dare you to tell the difference between Faux Fencing and real dry-stacked stone walls.
